Plant Science, 65 (1989) 261 – 264
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 65 (1989)

Abscisic acid, artificial seeds, desiccation tolerance, somatic embryogenesis, triazole, 252
Acetate, weak acids, photosynthesis, cytoplasmic pH, *Chara*, 5,5-dimethyloxazolidine-2,4-dione, 15
Active site groups, phosphoenolpyruvate phosphatase, half site reactivity, 161
Aestivum, amylase inhibitors, trypsin inhibitors, 25
Agrobacterium tumefaciens, crown gall, ent-kaurene, gibberellin biosynthesis, *Helianthus annuus*, sunflower, 171
Albino regenerated plants, wheat, pollen embryo tissue culture, mitochondrial DNA, genomic variability, 103
Amaranthus, protoplasts, calcium transport, cytokinin, fusicoccin, 243
Amylase inhibitors, *Triticum aestivum*, trypsin inhibitors, 25
Anther culture, *Triticum aestivum*, haploidy, donor plant, temperature, 225
Arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylarginine, difluoromethylornithine, ethylene, polyamines, somatic embryogenesis, 45
Artificial seeds, abscisic acid, desiccation tolerance, somatic embryogenesis, triazole, 252
Asparagus officinalis, cell culture, cell cycle reactivation, dedifferentiation, non-hypertonic medium, 111
Auxin, indoleacetic acid, binding, receptor, *Cicer arietinum*, 135
Avena sativa, *Puccinia coronata*, protein kinases, 143

Binding, auxin, indoleacetic acid, receptor, *Cicer arietinum*, 135
Bradyrhizobium japonicum, glutamine synthetase, nodules, legumes, *Rhizobium fredii*, 33

Calcium transport, *Amaranthus*, protoplasts, cytokinin, fusicoccin, 243
Carrot (*Daucus carota*), arginine decarboxylase, ornithine decarboxylase, difluoromethylarginine, difluoromethylornithine, ethylene, polyamines, somatic embryogenesis, 45
Carrot (*Daucus carota* L.), conditioning factors, plating efficiency, 125
Cassava latent virus, geminivirus, direct DNA-transfer, replication, viral plant vector, 207
cDNA sequence, lupin nodulin N-45, hybrid selected translation, 87
Cell culture, *Asparagus officinalis*, cell cycle reactivation, dedifferentiation, non-hypertonic medium, 111
Cell cycle reactivation, *Asparagus officinalis*, cell culture, dedifferentiation, non-hypertonic medium, 111
Chara, weak acids, photosynthesis, cytoplasmic pH, acetate, 5,5-dimethyloxazolidine-2,4-dione, 15
Chloroplasts, *Phaseolus vulgaris*, photosynthesis, protoplasts, 177
Chlorsulfuron resistance, *Lycopersicon esculentum*, *Lycopersicon peruvianum*, electroporation, kanamycin resistance, 63
Cicer arietinum, auxin, indoleacetic acid, binding, receptor, 135
Circadian rhythm, malate, nitrate reductase, nitrogen starvation, tungstate, 191
Conditioning factors, carrot (*Daucus carota* L.), plating efficiency, 125
4-Coumarate:CoA ligase, phenylalanine ammonia-lyase, peroxidase, lignification, resistance, elicitor, 183
Crown gall, *Agrobacterium tumefaciens*, ent-kaurene, gibberellin biosynthesis, *Helianthus annuus*, sunflower, 171
Cytokinin, *Amaranthus*, protoplasts, calcium transport, fusicoccin, 243
Cytoplasmic pH, weak acids, photosynthesis, *Chara*, acetate, 5,5-dimethyloxazolidine-2,4-dione, 15

Daucus carota, glycoprotein, β-13-glucanase, N-linked oligosaccharide, secretion, wall-bound enzyme, 39
Daucus carota, tonoplast, proton-translocating ATPase, *Triticum aestivum*, fluoroaluminate, 153
Dedifferentiation, *Asparagus officinalis*, cell culture, cell cycle reactivation, non-hypertonic medium, 111
Desiccation tolerance, abscisic acid, artificial seeds, somatic embryogenesis, triazole, 252
Difluoromethylarginine, arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylornithine, ethylene, polyamines, somatic embryogenesis, 45
Difluoromethylornithine, arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylarginine, ethylene, polyamines, somatic embryogenesis, 45
5,5-Dimethyloxazolidine-2,4-dione, weak acids, photosynthesis, cytoplasmic pH, *Chara*, acetate, 15
Direct DNA-transfer, geminivirus, *Cassava* latent virus, replication, viral plant vector, 207

Donor plant, *Triticum aestivum*, anther culture, haploidy, temperature, 225

Electroporation, *Lycopersicon esculentum*, *Lycopersicon peruvianum*, kanamycin resistance, chlorsulfuron resistance, 63
Elicitor, phenylalanine ammonia-lyase, 4-coumarate:CoA ligase, peroxidase, lignification, resistance, 183
Endosperm, wheat grain, protoplast, isolation, enzyme latency, sugar uptake, starch synthesis, 55
Ent-kaurene, *Agrobacterium tumefaciens*, crown gall, gibberellin biosynthesis, *Helianthus annuus*, sunflower, 171
Enzymatic synthesis of polyisoprene, substituted tertiary amine, isoprenoid induction, polyisoprenoid stimulation, 199
Enzyme latency, endosperm, wheat grain, protoplast, isolation, sugar uptake, starch synthesis, 55
Ethylene, arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylarginine, difluoromethylornithine, polyamines, somatic embryogenesis, 45

Fluoroaluminate, tonoplast, proton-translocating ATPase, *Triticum aestivum*, *Daucus carota*, 153
Fusicoccin, *Amaranthus*, protoplasts, calcium transport, cytokinin, 243

Geminivirus, *Cassava* latent virus, direct DNA-transfer, replication, viral plant vector, 207
Gene expression, legume, morphogenesis, nodulin, *Rhizobium*, root hair, root nodule, symbiosis, 1
Gene expression, *Solanum carolinense*, organogenesis, RNA and protein synthesis, in vitro translation, 77
Genomic variability, wheat, pollen embryo tissue culture, albino regenerated plants, mitochondrial DNA, 103
Gibberellin biosynthesis, *Agrobacterium tumefaciens*, crown gall, ent-kaurene, *Helianthus annuus*, sunflower, 171
β-1,3-Glucanase, glycoprotein, N-linked oligosaccharide, secretion, wall-bound enzyme, *Daucus carota*, 39
Glutamine synthetase, nodules, legumes, *Rhizobium fredii*, *Bradyrhizobium japonicum*, 33
Glycoprotein, β-1,3-glucanase, N-linked oligosaccharide, secretion, wall-bound enzyme, *Daucus carota*, 39
Gramineae, *Paspalum*, somatic embryogenesis, in vitro, 217

Half site reactivity, phosphoenolpyruvate phosphatase, active site groups, 161
Haploidy, *Triticum aestivum*, anther culture, donor plant, temperature, 225
Helianthus annuus, *Agrobacterium tumefaciens*, crown gall, ent-kaurene, gibberellin biosynthesis, sunflower, 171
Hybrid selected translation, lupin nodulin N-45, cDNA sequence, 87

Indoleacetic acid, auxin, binding, receptor, *Cicer arietinum*, 135
In vitro, *Paspalum*, somatic embryogenesis, *Gramineae*, 217
In vitro translation, *Solanum carolinense*, organogenesis, RNA and protein synthesis, gene expression, 77
Isolation, endosperm, wheat grain, protoplast, enzyme latency, sugar uptake, starch synthesis, 55
Isoprenoid induction, substituted tertiary amine, polyisoprenoid stimulation, enzymatic synthesis of polyisoprene, 199

Kanamycin resistance, *Lycopersicon esculentum*, *Lycopersicon peruvianum*, electroporation, chlorsulfuron resistance, 63

Legume, gene expression, morphogenesis, nodulin, *Rhizobium*, root hair, root nodule, symbiosis, 1
Legumes, glutamine synthetase, nodules, *Rhizobium fredii*, *Bradyrhizobium japonicum*, 33
Lignification, phenylalanine ammonia-lyase, 4-coumarate: CoA ligase, peroxidase, resistance, elicitor, 183
Lupin nodulin N-45, cDNA sequence, hybrid selected translation, 87
Lycopersicon esculentum, *Lycopersicon peruvianum*, electroporation, kanamycin resistance, chlorsulfuron resistance, 63
Lycopersicon peruvianum, *Lycopersicon esculentum*, electroporation, kanamycin resistance, chlorsulfuron resistance, 63

Malate, circadian rhythm, nitrate reductase, nitrogen starvation, tungstate, 191
Microfluorimetry, "Mitchell" *Petunias*, ploidy determinations, 119
"Mitchell" *Petunias*, ploidy determinations, microfluorimetry, 119
Mitochondrial DNA, wheat, pollen embryo tissue culture, albino regenerated plants, genomic variability, 103
Morphogenesis, gene expression, legume, nodulin, *Rhizobium*, root hair, root nodule, symbiosis, 1

N-linked oligosaccharide, glycoprotein, β-1,3-glucanase, secretion, wall-bound enzyme, *Daucus carota*, 39
Nitrate reductase, circadian rhythm, malate, nitrogen starvation, tungstate, 191
Nitrogen starvation, circadian rhythm, malate, nitrate reductase, tungstate, 191
Nodules, glutamine synthetase, legumes, *Rhizobium fredii*, *Bradyrhizobium japonicum*, 33
Nodulin, gene expression, legume, morphogenesis, *Rhizobium*, root hair, root nodule, symbiosis, 1
Non-hypertonic medium, *Asparagus officinalis*, cell culture, cell cycle reactivation, dedifferentiation, 111

Organogenesis, *Solanum carolinense*, RNA and protein synthesis, in vitro translation, gene expression, 77

Ornithine decarboxylase, arginine decarboxylase, carrot (*Daucus carota*), difluoromethylarginine, difluoromethylornithine, ethylene, polyamines, somatic embryogenesis, 45

Paspalum, somatic embryogenesis, in vitro, *Gramineae*, 217

Peroxidase, phenylalanine ammonia-lyase, 4-coumarate: CoA ligase, lignification, resistance, elicitor, 183

Phaseolus vulgaris, chloroplasts, photosynthesis, protoplasts, 177

Phenylalanine ammonia-lyase, 4-coumarate:CoA ligase, peroxidase, lignification, resistance, elicitor, 183

Phosphoenolpyruvate phosphatase, active site groups, half site reactivity, 161

Photosynthesis, chloroplasts, *Phaseolus vulgaris*, protoplasts, 177

Photosynthesis, weak acids, cytoplasmic pH, *Chara*, acetate, 5,5-dimethyloxazolidine-2,4-dione, 15

Pinus elliottii, slash pine, somatic embryogenesis, somatic proembryos, single cell origin, 233

Plating efficiency, carrot (*Daucus carota* L.), conditioning factors, 125

Ploidy determinations, "Mitchell" *Petunias*, microfluorimetry, 119

Pollen embryo tissue culture, wheat, albino regenerated plants, mitochondrial DNA, genomic variability, 103

Polyamines, arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylarginine, difluoromethylornithine, ethylene, somatic embryogenesis 45

Polyisoprenoid stimulation, substituted tertiary amine, isoprenoid induction, enzymatic synthesis of polyisoprene, 199

Protein kinases, *Avena sativa*, *Puccinia coronata*, 143

Protoclones, protoplasts, rice, variation, seed progeny, 97

Proton-translocating ATPase, tonoplast, *Triticum aestivum*, *Daucus carota*, fluoroaluminate, 153

Protoplast, endosperm, wheat grain, isolation, enzyme latency, sugar uptake, starch synthesis, 55

Protoplasts, *Amaranthus*, calcium transport, cytokinin, fusicoccin, 243

Protoplasts, chloroplasts, *Phaseolus vulgaris*, photosynthesis, 177

Protoplasts, rice, protoclones, variation, seed progeny, 97

Puccinia coronata, *Avena sativa*, protein kinases, 143

Receptor, auxin, indoleacetic acid, binding, *Cicer arietinum*, 135

Replication, geminivirus, *Cassava* latent virus, direct DNA-transfer, viral plant vector, 207

Resistance, phenylalanine ammonia-lyase, 4-coumarate: CoA ligase, peroxidase, lignification, elicitor, 183

Rhizobium, gene expression, legume, morphogenesis, nodulin, root hair, root nodule, symbiosis, 1

Rhizobium fredii, glutamine synthetase, nodules, legumes, *Bradyrhizobium japonicum*, 33

Rice, protoplasts, protoclones, variation, seed progeny, 97

RNA and protein synthesis, *Solanum carolinense*, organogenesis, in vitro translation, gene expression, 77

Root hair, gene expression, legume, morphogenesis, nodulin, *Rhizobium*, root nodule, symbiosis, 1

Root nodule, gene expression, legume, morphogenesis, nodulin, *Rhizobium*, root hair, symbiosis, 1

Secretion, glycoprotein, β-1,3-glucanase, N-linked oligosaccharide, wall-bound enzyme, *Daucus carota*, 39

Seed progeny, protoplasts, rice, protoclones, variation, 97

Single cell origin, slash pine, *Pinus elliottii*, somatic embryogenesis, somatic proembryos, 233

Slash pine, *Pinus elliottii*, somatic embryogenesis, somatic proembryos, single cell origin, 233

Solanum carolinense, organogenesis, RNA and protein synthesis, in vitro translation, gene expression, 77

Somatic embryogenesis, abscisic acid, artificial seeds, desiccation tolerance, triazole, 252

Somatic embryogenesis, arginine decarboxylase, carrot (*Daucus carota*), ornithine decarboxylase, difluoromethylarginine, difluoromethylornithine, ethylene, polyamines, 45

Somatic embryogenesis, *Paspalum*, in vitro, *Gramineae*, 217

Somatic embryogenesis, slash pine, *Pinus elliottii*, somatic proembryos, single cell origin, 233

Somatic proembryos, slash pine, *Pinus elliottii*, somatic embryogenesis, single cell origin, 233

Starch synthesis, endosperm, wheat grain, protoplast, isolation, enzyme latency, sugar uptake, 55

Substituted tertiary amine, isoprenoid induction, polyisoprenoid stimulation, enzymatic synthesis of polyisoprene, 199

Sugar uptake, endosperm, wheat grain, protoplast, isolation, enzyme latency, starch synthesis, 55

Sunflower, *Agrobacterium tumefaciens*, crown gall, ent-kaurene, gibberellin biosynthesis, *Helianthus annuus*, 171

Symbiosis, gene expression, legume, morphogenesis, nodulin, *Rhizobium*, root-hair, root nodule, 1

Temperature, *Triticum aestivum*, anther culture, haploidy, donor plant, 225

Tonoplast, proton-translocating ATPase, *Triticum aestivum*, *Daucus carota*, fluoroaluminate, 153

Triazole, abscisic acid, artificial seeds, desiccation tolerance, somatic embryogenesis, 252

Triticum aestivum, amylase inhibitors, trypsin inhibitors, 25

Triticum aestivum, anther culture, haploidy, donor plant, temperature, 225

Triticum aestivum, tonoplast, proton-translocating ATPase, *Daucus carota*, fluoroaluminate, 153

Trypsin inhibitors, *Triticum aestivum*, amylase inhibitors, 25

Tungstate, circadian rhythm, malate, nitrate reductase, nitrogen starvation, 191

Variation, protoplasts, rice, protoclones, seed progeny, 97
Viral plant vector, geminivirus, *Cassava* latent virus, direct DNA-transfer, replication, 207

Wall-bound enzyme, glycoprotein, β-1,3-glucanase, N-linked oligosaccharide, secretion, *Daucus carota*, 39
Weak acids, photosynthesis, cytoplasmic pH, *Chara*, acetate, 5,5-dimethyloxazolidine-2,4-dione, 15
Wheat, pollen embryo tissue culture, albino regenerated plants, mitochondrial DNA, genomic variability, 103
Wheat grain, endosperm, protoplast, isolation, enzyme latency, sugar uptake, starch synthesis, 55
